-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sperka et al. No distinction is seen between the catalyst disclosed by Sperka et al, and that recited in claims 18-20. Sperka et al disclose catalysts consisting of platinum, palladium and aluminum nitride in the paragraph bridging columns 1 and 2.

Claims 9, 10, 13 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hippel et al '455. No distinction is seen between the process disclosed by Hippel et al '455, and that recited in claims 9, 10, 13 and 14. Hippel et al '455 discloses the BMA process in Paragraph [0001], and teaches in Paragraph [0025] that the catalyst may be a combination of Pt and Pd.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hippel et al '455 as applied to claim 9 above, and further in view of Benderly. It would be further obvious from Paragraph [0011] to include gold or silver in the catalyst of Hippel et al

Art Unit: 1754

'455, since Benderly discloses in claim 7 that the catalyst may be used in the BMA process.

Claims 9, 10, 13 and 14 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Benderly. No distinction is seen between the process disclosed by Benderly, and that recited in claims 9, 10, 13 and 14. Benderly disclose the BMA process (claim 7), and teaches in Paragraph [0011] that the catalyst may be platinum in combination with such metals as palladium, gold and silver.

Claims 11, 12, 15¹⁷ and 16 are objected to as based on a rejected parent claim, and would be allowed if written in independent form.

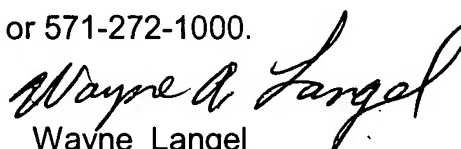

The other references are made of record for disclosing the BMA process using various platinum containing catalyst.
